**Magento** is the eCommerce software platform for growth that promises to revolutionize the industry. It's modular architecture and unprecedented flexibility means your business is no longer constrained by your eCommerce platform.

Migrating store information to Magento is a complicated and time-consuming process. It can take much time, efforts, require high tech skills and cost lots of money. There are several methods, but never of them is easy for online merchants and each of them causes data loss at some point.

Now you can use Cart2Cart and migrate your store information easily and withing limited time period. Cart2Cart shopping cart migration service will help you to move your store data, saving the relationships between entities (categories, products, customers, orders etc).

### Cart2Cart supports migration of following entities:

- product categories
  - products
  - product attributes
-

- customers
- orders
- order statuses
- currencies
- manufacturers
- product images
- category images

Additional entities are constantly added.

**Cart2Cart offers following shopping carts migration:**

- [osCommerce to Magento](#)
- [CRE Loaded to Magento](#)
- [Zen Cart to Magento](#)
- [osCMax to Magento](#)
- [xt:Commerce to Magento](#)
- [X-Cart to Magento](#)
- [Pinnacle Cart to Magento](#)
- [CubeCart to Magento](#)
- Magento to Magento (copy/move data)

Please check service website for currently supported shopping carts.

**Assisted Migration Available**

Helpful assistants are ready to help with migration for busy merchants in case of need. They will go through migration wizard, setting up all the values to match your particular needs. You will get completely configured migration process, ready to start. Demo mode is available for your quality assurance before starting.

**Migration Partners Are Ready to Help**
