

Store Manager for X-Cart

Price: \$149.00

Product description:

Store Manager for X-Cart is a Windows application to quickly and effectively manage your X-Cart online store.

You can add, delete and update products, categories and manufacturers, automatically upload your product images while editing products, categories, manufacturers, view reports, orders and keep the track of your online sales. All this from your desktop computer.

MagneticOne Store Manager for X-Cart was made for ordinary users not for computer specialists, only few settings required for program to start and it just works.

Store Manager for X-Cart Features

- Add, delete, modify products, categories, product manufacturers, product options **very quickly**
 - View, edit, print reports, invoices
 - Easy product navigation, **quick search**, filters
 - PHP MySQL bridge - work with your store **without direct MySQL connection**
 - **Embedded MySQL server** - work locally with your data and put changes to remote database when all changes are done - will save your time especially for slow connections
 - **Image management** functions (if FTP provided)
 - **Extended attribute editor** with **download attributes** - quickly manage product attributes
 - **Instant changes** - all changes you made applied to your store immediately, no synchronization, no delayed updates
 - **Multilanguage**, you can manage all languages in your online store
-

- **Product copy/paste** feature - easy move products between categories and stores!
- **Attribute copy/paste** feature - configure one product with proper attributes and then just populate all other products with attributes by one mouse click
- **Additional fields** - for products and customers
- **Editable reports** - reports can be edited with Report Tool, modified or translated to another language
- Custom reports - **design your own reports** with advanced query builder and report editor tool
- **SSH support** - for secure connections
- **Simple and quick installation.** Just run installer and click Next several timer, no unintelligible options and parameters, no stupid questions
- **Easy registration procedure.** You do not need to litter your head with serials or other stuff, just input your name and click OK button, that's all
- **Supports X-Cart version 4.0.x, 4.1.x, 4.2.x, 4.3*, 4.4.***
- Supports multiple **MySQL versions including MySQL 5**
- **MySQL compressed protocol** support for better speed!
- Direct connection to the MySQL database (no additional php modules or server changes needed).
- **Multiple stores management.** Store your configuration data and quickly switch between stores.
- Database **backup/restore** - keep your data safe
- **Store configuration** - edit all store settings in one window. Should be used by advanced users who really know what they doing
- **Encrypted passwords** for increased security
- **Native Windows application.** Just the program, no server side scripts, no additional modules. Run the program, specify connection settings and voila - it works!
- **User friendly interface.** Only few required options - you have to work with your store but not waste your time investigating the program

Store Manager for X-Cart Full license includes **6 months** of Update Service

For MAC Users:

Store Manager requires a PC Emulator to run on a MAC.

Please note that this does reduce the performance of the Store Manager software.

You can use the following compatible PC Emulators:

- [Parallels Desktop® for Mac](#)
 - [VMware Fusion®](#)
-

if you want to run Windows and Mac applications at the same time, without rebooting, you can install Windows using VMware or Parallels software.

For Linux Users:

For Linux users **we recommend** VirtualBox and Windows installation; you can get more information at: <http://www.virtualbox.org>

Please note that this does reduce the performance of the Store Manager software
