

x-Cart Pay Quake Payment Module

Price: \$49.00

Product description:

X-Cart mod - integration with Pay Quake online payment system/gateway to X-Cart shopping cart.

payQuake Payment Gateway and Virtual Terminal software is a scalable and easily customizable payment processing solution, including credit cards, checks, and recurring billing features.

With payQuake you have a choice of three individual merchant account processing plans, ranging from No Set-Up and No Monthly Merchant Account Fees to discount rates as Low as 1.59%. Secure payment gateway fees including our payQuake Gateway or Authorize.net are also INCLUDED with your payQuake merchant account.

Simply, if your merchants feel that the merchant account plan they chose is not perfect for their business, or they have outgrown their current plan, they can seamlessly switch to whichever payQuake merchant account plan works best for them. It is called Dynamic Merchant Pricing (or DMP). payQuake created this technology.

Merchants love to be in control, and have the ability to quickly adjust their merchant account to the most economically beneficial merchant account for the next processing month.

Putting the merchant in control of their secure payment gateway and merchant account fees each and every month is what separates payQuake from all of the other merchant account providers in our industry today.

The Dynamically priced merchant accounts offered exclusively by payQuake renders the standard one size fits all merchant accounts obsolete. And when you also add our world class customer service, we provide an eCommerce offering in a league of its own.

PayQuake advantages for merchants

payQuake provides you with the latest merchant processing technology including our new "auto-approval process", same day approval to get your customers business up and running fast, an Online application with "Mouse Signature" capabilities so your customers don't have to sign and fax paperwork back and forth, and in most cases, no need for a drivers license or a copy of a bank check.

payQuake is the only company on the internet that provides Dynamic Merchant Pricing (DMP). This means that customers have the flexibility to change easily month to month from any of our 3 merchant account plans. The "power of choice" is a very powerful tool for your merchants.
