

osCommerce eDirectory Data Feed

Price: \$29.00

Product description:

osCommerce eDirectory Data Feed is a osCommerce contribution which assures the easiest export of your products into edirectory.co.uk - one of the best **Pay-Per-Click** services.

edirectory.co.uk will help you find the right product at the right price when you're shopping online. **eDirectory** offers an excellent opportunity to promote your business and your products to an extensive audience! And Joining couldn't be easier!

edirectory.co.uk is a huge online shopping site, featuring products from over 600 different retailers. They're now into 10th year of leading the way in online shopping and are the UK's largest and most visited shopping site. eDirectory operates like a one stop shop (nobody else in the UK works like this) where shoppers can purchase goods from many different merchants, but add them all to a single, secure basket. For customers, the convenience and ease of being able to buy all their goods under the one roof, without linking out to many different websites is uniquely appealing.

eDirectory has a vast shopping network. In addition to central eDirectory site, they also manage the shopping for an additional 30 high traffic websites, so your products would feature on these sites also! **YOUR** products can now be featured for sale across all eDirectory sites, thereby immediately becoming accessible to vastly greater numbers of additional Internet shoppers (those you are not yet reaching!).
