What Mass AdWords Product Ads for osCommerce can do for you:

1. **Save Time**
-

Most operations are automated, you need to make only key decisions

2. Increase Sales

More better targetted and relevant ads bring more sales and more profits as a result

3. Simplify Ad Management

Will save you hours every day, day by day

4. Minimize Errors and Inconsistency

Ads will include proper product names, lead to proper products that are in available and in stock, always

5. Bring new possibilities

Laser-targetted campaigns are now reality!

Features that will make your life easier:

1. Create separate ads for each product in your store

You can create separate ads for each product, including product name, model, price, manufacturer, store name and more then 20 other macros right into the ad! This brings unbelievable ad precision, previously available to large enterprises only.

2. Automatically find proper keywords for each product

You have control over keyword selection process, including product variables only (product name, product model, product manufacturer (and other product-specific fields) only - for laser-targetted campaigns), keyword matching options (broad match, exact match, phrase match) and more.

3. Create multiple ads for each product by template

You can use built-in predefined templates or add your own ad templates!

Just create multiple ad variations for each product and let AdWords Optimizer find our the ones, which work best for you automatically. Manual selection also available.

4. Preview which ads will be created

Before you generate anything - you can preview and disable ads, that you think won't work for any reason.

5. Even more features inside

You will find more options and possibilities that will make your work much more convenient and easy.
