

Store Manager for osCommerce - Additional License

Price: \$89.00

Product description:

Store Manager for osCommerce is a Windows application to quickly and effectively manage your osCommerce online store.

- Manage osCommerce products, osCommerce product attributes, categories, manufacturers, orders and other things
- Export osCommerce products into Excel file, edit it and then import products into osCommerce store - batch updates are so fast now!
- Import products into osCommerce from your supplier - osCommerce product import is one of the prominent features, import from Excel/CSV into osCommerce in seconds

All this and more from your desktop computer - save your time, do not waste it with all that routine tasks! MagneticOne Store Manager for osCommerce was made for ordinary users not for computer specialists, only few settings required for program to start and it just works.

Store Manager for osCommerce site

In order to use Store Manager for osCommerce you need to have separate license for every computer. If you already have a Full License, you can order Additional Licenses at discount rate to use within same organization/family.

Before you place your order for Store Manager for osCommerce Additional License make sure that:

- You do have a valid Full License for this software
 - You purchased this Full License through magneticone.com/store. If not - make sure you are using the
-

same email to purchase Store Manager for osCommerce Additional Licenses as you did to order Store Manager for osCommerce Full License.

If these two requirements are not met - your Store Manager for osCommerce Additional License will not work.

Store Manager for osCommerce Additional license includes **6 months** of Update Service

For MAC Users:

Store Manager requires a PC Emulator to run on a MAC.

Please note that this does reduce the performance of the Store Manager software.

You can use the following compatible PC Emulators:

- [Parallels Desktop® for Mac](#)
- [VMware Fusion®](#)

if you want to run Windows and Mac applications at the same time, without rebooting, you can install Windows using VMware or Parallels software.

For Linux Users:

For Linux users **we recommend** VirtualBox and Windows installation; you can get more information at: <http://www.virtualbox.org>

Please note that this does reduce the performance of the Store Manager software

Oscommerce, Os Commerce, Oscommerce Manager
